

Reel Estimator **Spot**TM Check

How Many Parts? *Stop Guessing!*

The **SpotCheck**TM Reel Estimator quickly determines counts to within 5%. **SpotCheck**TM is an affordable handheld meter designed for inventory management and job setup to determine tape and reel part counts. This meter provides accurate estimates without the cost or complexity of a bench top counter.

Features:

- ✓ Works with all tape widths, thicknesses and component types/pitches
- ✓ Works with both 7in.(18cm) and 13in.(33cm) reels
- ✓ Estimates component counts to within 5%
- ✓ Self contained, handheld, battery powered

\$449

Product #25050

How it works:

Make 4 easy measurements with the meter's integral ruler and gauge then enter the values into the meter for instant display of the component count. This simple process takes less than 60 seconds per reel. For repetitive use on reels of similar parts only one measurement needs to be changed to obtain each reel's count.

Specifications:

- Accuracy 5% • Reels must have standard 13mm center hole
- Tape must have standard 4mm spaced feed holes • Measures up to 13in(33cm) OD reels (15 in. reels can be measured with user supplied ruler) • Powered by 9 volt battery
- 7.5in.(19cm) x 4in.(10cm) x 1in.(2.5cm) • Weighs 0.4lbs(180g) • Made in U.S.A.
- 1 Year Warranty
