

SpotOn™

Sprayer Calibrator

Accurate Flow Rate Measurement in Seconds

- **Quickly find worn spray nozzle tips** – Industry guidelines recommend tip replacement once flow rate exceeds that of a new tip by 10%.
- **Accurately measure true tip flow rate** – Today's high tech sprayers can only be properly calibrated and confirmed with this knowledge.
- **Fast and simple operation** – Readings in 10 seconds or less per tip.

Avoid costly over or under application of chemicals!

Press START button then hold meter under nozzle at slight angle.

Allow the meter to fill until display shows flow rate.

Empty the meter by pouring the water out of the top. Display holds reading for 90 seconds.
